HOME AT YOUR FINGERTIPS

Control your home from your smartphone
anytime, anywhere

WELCOME TO YOUR SMART HOME

At ino**ho**, we aim to create simple, secure and easy to install smart home solutions which are usable, affordable and enjoyable for everyone.

ino**ho** adds to your comfort at home and to convenience when away. It blends into your daily schedule and transforms your life.

SMART LIVING

A revolutionary way of controlling your lights, fans, geysers, ACs and other appliances from anywhere in the world.

Imagine a home where you always enter a pre-cooled room in summers, and there is always hot water in the geyser when you wake up in winters; a home where you never fret about leaving something switched on.

ino**ho** gets your home to act on your command, wherever you are.

Wireless

No rewiring required

Retrofit

Perfect for new as well as old homes

Seamless

Manual switches work as usual

Scalable

Start with one room, extend later

Affordable

Well within your budget

Curtains & Blinds

Can be integrated with motorized curtains
Control your curtains from mobile.
Use more of day light.
Adds to convenience and privacy.

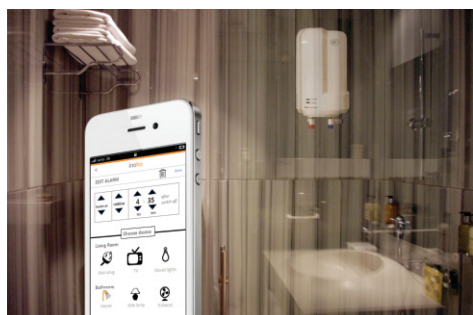

Water sprinklers

Can control water sprinklers
Automate your watering system
Enjoy greener lawn and healthier plants.
Reduces time and avoid water wastage.

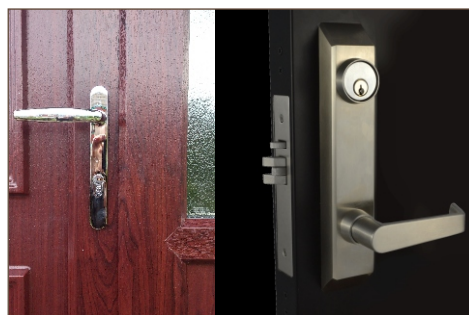

IP Cameras

Connects with IP Cameras
View your home/office from anywhere
Keep a watch on kids/employees
Get notification when bell rings and see who is at your door
Replace VDP with better option

Set timers & alarms

Let your appliances wake up before you do. Set auto on/off, schedules, timers and alarms for lights, ACs, geysers, etc.

Door lock

Integrates with electronic door lock
Open your door from anywhere
No need to pass on keys to maids, servants and guests
Enjoy keyless entry
Adds to comfort and safety

Reduce power bills

Avoid un-necessary usage of electricity by switching off the unused lights, geysers, etc from right where you are.

Get going in 3 easy steps:

Step 1:

Connect Home Controller

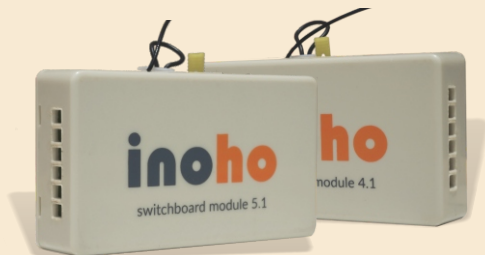

This sits near your wifi router. Entire home needs just one of this.

Step 2:

Fit in Switchboard Module

This sits behind each switch board panel and makes your electrical devices smart.

Step 3:

Access Inoho App

This lets you control your home from your smart phone through simple clicks and swipes.
